The Challenge

Whether you are embarking upon, or already on the journey towards a Pathology shared service, LIMS deployment, Pathology modernisation or are facing blockers to your progress. Our team can provide the rapid progress you need to achieve your essential objectives.

We are the only specialist team in the UK with a proven history of delivering complex Pathology programmes at pace, be they in a stand-alone laboratory or a complex multi-acute shared service.

Our team provides an end-to-end solution covering:

- Laboratory operations
- Robust UKAS aligned testing
- Accelerated programme management
- Simplified integration across multiple sites and organisations.

“Trust us to deliver on your promises”

Adding Value

Our approach provides additional value to your programme during and long after completion:

Bridging the gap:

- Our team specialise in understanding the distinct needs of IT and lab environments. We serve as the bridge between these departments, fostering seamless communication, collaboration, and understanding, leading to more effective solutions and cohesive operations.

Unique experience:

- Drawing from extensive experience, our team provides invaluable insights and lessons learned from past projects. We enhance decision-making, ensuring a more informed and efficient process, sparing you from the challenges of learning through trial and error.

Driving efficiency:

- We ensure BAU resources are utilised efficiently with minimal impact on laboratory operations.
